```java
package threads;

public class implementation extends Thread {
    public void run()
    {

        System.out.println("thread is runing");
    }
    public static void main(String args[])
    {

        implementation i=new implementation();
        i.start();
    }

}
```

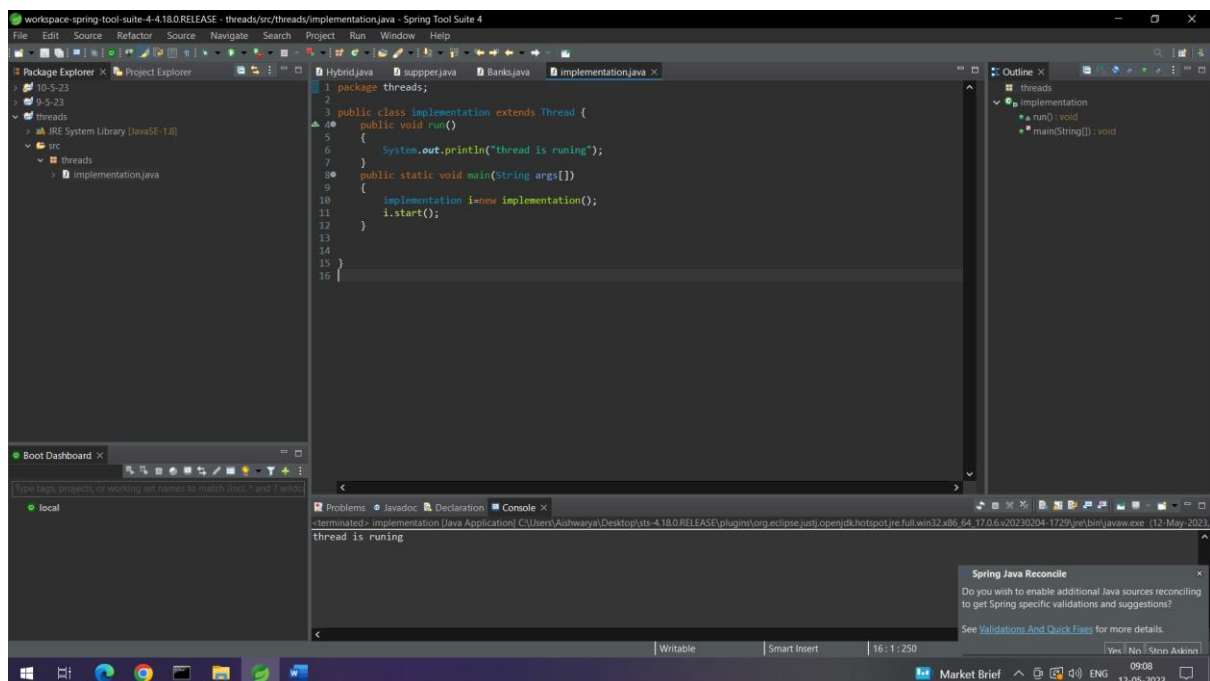

```java
package threads;

public class implementation implements Runnable
{

    @Override
    public void run() {
        System.out.println("thread is running");

    }

    public static void main(String args[])
    {
        implementation i = new implementation();
        Thread t1 = new Thread(i);//using the constructor thread(runnable r)
```

```
            t1.start();
        }

}
```
